Scribe database – Lab Results Edits to Sampling Locations

Changes requested by S. Graves (START) to Ex. 4 - CBI on 2/28/12

Edits to the Scribe database were made on 2/8/12 to maintain integrity with the GPS data, which differed between the home well and the post samples. An edit was made to the Location fields to include the “-P” suffix. However some of these changes were made after the samples had already been assigned to COCs. Consequently the corresponding lab result EDDs did not reflect the changes made to the Scribe database. To ensure the samples, lab results, and locations all correctly join together, the following changes are being proposed.

Sample No	Sample Date	Location Prior to Edit	Location After Edit	Analysis
HW08A		HW08	HW08a	71 Drinking Water; 71/71 Drinking Water (Total/Dissolved); Dissolved HC Gases; SM 5540 C / SOP C-61; TPH – Extractable; TPH - Purgeable
